

## Laboratory Testing

QIMA's laboratory testing services help you assess your products according to the regulatory, safety, quality and performance standards of your destination market. With full accredited testing capabilities in Asia, Europe, and America, QIMA helps brands, retailers and importers in over 85 countries to ensure product compliance.

## Receive Testing Support Every Step of the Way —

### Test Protocol Development

QIMA experts help you develop tailored made testing protocol for your product by identifying the requirements of your target market and product claim.

### Quality Assurance Support

Technical guidance to assist with critical production decisions throughout product development and manufacturing. Also provide consultancy service on regulatory updates and product user guide review.

# Key Benefits of Testing with QIMA

## Industry-leading Turnaround Time

Usually 3-5 days. 99% on-time delivery all year around & 23% early report delivery.

## Flexibility

Fully customizable programs and reports to include tests you need, saving time and cost.

## Online dashboard with centralized system across all QIMA labs

Your testing program progress and results are visible instantly and consistent across all global teams.

## Risk-based approach

Analytical data helps you proactively identify and prevent quality and safety issues in your supply chain.

## Expertise for quality improvement

Product development and manufacturing development: regulatory compliance assessments and QA programs, product engineering services, failure root cause analysis and fit for use testing design to enhance your product quality.

## Personalized service

One key contact point, 24/7 online customer support, and easy sample pick up at your chosen locations.

## Extensive Testing Capabilities Specific to Your Product

QIMA offers one-stop services for a wide range of consumer products in Asia, Europe, and America. We ensure your products are compliant toward various regulatory standards including Australia, China, EU, US and more.
