# SASO HS Codes Update

On December 7, 2020, SASO updated the list of HS Codes on the SABER platform. This was based on the General Customs Authority's annual update on the integrated customs tariff. Some HS Codes have been deleted and replaced with new codes. For a list of updated HS Codes please visit https://saber.sa/PrivateUM/HSCodes/HSCodes.pdf.

For those existing product certificates (PC's or PCoC's) that have affected HS Codes, their validity will depend on whether or not the fees have been paid. If all payments have been made, then the deleted HS Codes will be mapped to the new codes in the systems. When the importer is ready to declare the Shipment Certificate in FASAH he/she will need to enter the Shipment Certificate (SC) number. The importer will then need to enter the new HS code which can be found in the link above by searching for the old code listed on the right-hand side of the sheet and finding the corresponding new code on the left-hand side.

If the fees for conformity requests or self declarations have not been paid (are still in pending SASO payment status) and the HS Code listed in the request has been deleted, the request is canceled, and you must request a new one with the new HS Code listed. This applies to both self-declarations and certificates of conformity that have been issued through a certification body (CB).

For additional information on this process, please contact info@saso.gov.sa.
